

THE DIGITAL CLINIC

Manfred Doepp MD

QuantiSana Health Center, Digital Clinic, Head, www.quantisana.ch
2 Wartensee, Rorschacherberg CH 9404, Switzerland

Topics

For healthcare purposes we have two qualifications in our **QuantiSana Health Center** linked to the present and future time lines and energies. They involve the application of the Internet and digital communication on medicine as well as the integration of computerized homeopathy into healthcare. Since 2017, homeopathy has officially been accepted in public healthcare in Switzerland. In a digital clinic a patient does not have to appear personally anymore. His identity, however, has to be clear: name, address, birth date, photo or DNA (hair, saliva or blood). - Quotations from the "Confidential Swiss Letter" from October 4, 2016. «*The Internet is about to start a new triumph of its technology. From today to 2020 the digital health care market will explode to over 200 billion dollars. With the "Horizon 2020" initiative, the EU provides 600 million Euros for the digital future of Europe. The digital evaluation of health data will lead to an individual medication for the patient, without having to consult doctors.*»

Goals

The methods are based on two principles a) an individualization, and b) an objectivation. Both criteria are not standard in conventional medicine. Basics within usual medical decision making are schemes (not individualized, « evidence-based medicine ») or attempts to overcome uncertainty (not objective, « experience- or authority-based medicine »).

What we do

In our Center we create online diagnoses and make them complete by means of online therapies. We use a computerized and advanced radionic device (TimeWaver™ <http://en.timewaver.com/uk>) which goes into resonance with the patient's individual information patterns inside the global information field.

https://www.researchgate.net/publication/284186090_Liouville%27s_Theorem_in_Classical_Mechanics_and_the_Global_Information_Field via a Kozyrev mirror <https://de.scribd.com/document/184752654/Kozyrev-Mirrors> and two entangled quantum random number generators https://en.wikipedia.org/wiki/Hardware_random_number_generator. The topics or remedies resp. which have been found to be important for the patient are sent as frequency patterns by quantum teleportation absent treatment https://en.wikipedia.org/wiki/Quantum_teleportation. This method is independent from space and time. Additionally the patient receives the resulting lists as e-mail attachments.

The Information Field

The foundations of the system about consciousness and its interaction with matter are found in quantum physics and depth psychology. The connection between the two, according to the German physicist **Burkhard Heim**, is the Information Field <http://archiv.mufon-ces.org/text/english/heimphysics.htm> and https://en.wikipedia.org/wiki/Burkhard_Heim. B. Heim postulated a 12-dimensional cosmological model, from d1-d3 = matter, d4 = time, d5-d6 = energetical regulation field, d7-d8 = global information field, d9 = free human will, d10 = imaginations, visions, d11 = cosmic consciousness, and d12 = the Source.

Digital Homeopathy

In homeopathy the basis is the repertorizing procedure https://en.wikipedia.org/wiki/Arndt%E2%80%93Schulz_rule. A detailed examination of the patient's symptoms is performed and the results are compared with the appropriate list of the repertory <http://homeoint.org/hidb/kent/repertory.htm>. Repertory software is used to facilitate the search for simile. Our software contains more than 600,000 digitalized information concerning symptoms and remedies. The simile https://en.wikipedia.org/wiki/Samuel_Hahnemann and other similar and effective agents can be identified in each case.

The Future

The future meets the expectation and description of the 6th Kondratieff wavecycle <http://www.kondratieffwavecycle.com/kondratieff-wave/> for the period of integration of IT/information technology into individual healthcare. Wikipedia: "Several candidates have been determined as technologies that dominate the 6th Kondratieff cycle: biotechnology, nanotechnology, psychosocial health and competence, mobile internet... Since 1996, Nefedov in his book "The Sixth Kondratieff" has argued that the next basic innovation will be in the health sector." https://www.goodreads.com/author/show/4173368.Sergey_A_Nefedov. This kind of «medicine of the future» we are performing in our daily healing work since four years. The results are impressive, especially in patients who do not think doubtful thoughts (new-borns or coma patients).
